TST Safety Shoes 500 Bar

Produktnummer: TST5652025-5000

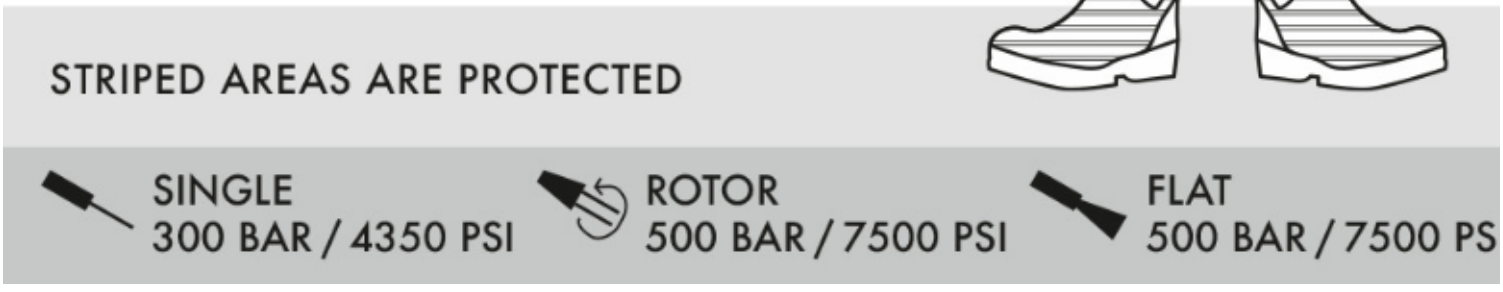

Water jetting Boots 500 bar

- Protective and waterproof.
- Made entirely of vulcanized rubber, the black parts of the boots are reinforced and withstand high pressure water jets.
- Designed for hours and hours of hard work. Textile inner lining for good comfort.
- Steel toecap and steel inserts to withstand sharp objects from underneath. The sole is designed for good grip.
- The boot shaft can be tightened with an adjustable strap.
- CE Regulation (EU) 2016/425

It is essential that the operator knows where and for what the boots protect. The black parts clearly identifies protective areas, and the label tells the level of protection. White label indicates protection for 300 bar/4 350 psi single jet, 500 bar/7 500 psi rotor jet and 500 bar/7 500 psi flat jet – 3/5/5
