3M Tape Cloth Silver 3939, 48mm x 55m

Produktnummer: 3M3939

Highlights

Industrial-grade cloth duct tape for splicing, masking, patching, sealing, and seaming applications

High tensile strength provides a secure hold under demanding conditions

Thick rubber adhesive bonds to most rough and smooth surfaces, delivering a reliable seal

Silver polyethylene backing resists wear, peeling, and water

Ideal for hanging polyethylene sheeting for containment and enclosure applications

Suitable for use in temperatures up to 93°C (200°F)

3M™ Heavy Duty Duct Tape 3939 offers the tensile strength and adhesion required for splicing, masking, sealing, seaming, multi-layer hanging applications, sealing PVC pipe, covering trip hazards, and a wide range of other industrial uses.

3M™ Heavy Duty Duct Tape 3939 is constructed with a water-resistant polyethylene film laminated to a cloth reinforcement and coated with an aggressive natural rubber adhesive. The tape provides excellent adhesion and conformability. It tears easily and cleanly in both horizontal and vertical directions without fraying.

Industrial applications include hanging polyethylene sheeting for containment and enclosure systems, masking, and protecting surfaces from light sandblasting overspray. It is also widely used in the exhibition and events industry for securing and seaming carpet padding, taping down cables, and mounting display panels.

3M™ Heavy Duty Duct Tape 3939 can be used at temperatures up to 93°C (200°F). It has been flame tested in accordance with UL 723, ASTM E-84, NFPA 255, and UBC 8-1 test methods, achieving a Flame Spread Index of 0 and a Smoke Developed Index of 30.

Duct tape is a staple product for maintenance, repair, and construction applications. The term “duct tape” originates from its early use in heating, ventilation, and air conditioning (HVAC) systems, including the sealing of air ducts. Today, it is used wherever sealing, bundling, reinforcing, striping, splice insulation, capping pipe and duct ends, marking, temporary repairs, polyethylene sheeting installation, and protection from light sandblasting overspray are required.

Duct tape is widely used in residential, commercial, and industrial environments, as well as throughout the construction industry. It is commonly relied upon by electricians, manufacturers, marine professionals, military personnel, asbestos remediation contractors, and automotive and transportation industries.
