3M Glue Spray Strong 90

Produktnummer: 3M90

3M™ Hi-Strength 90 Spray Adhesive

3M™ Scotch-Weld™ Spray Adhesive 90 is our fast-drying, transparent spray adhesive that bonds to concrete, wood, MDF, laminates, polyethylene, and more. Its exceptionally strong adhesion delivers quick results, helping projects move forward efficiently. This industrial-grade formula is easy to dispense and apply directly to surfaces and materials, while also offering excellent heat and moisture resistance. Covers approximately 5 m², depending on the application.

The aerosol can is practical and easy to handle, featuring a spray nozzle that provides a controlled spray pattern. This level of control helps minimize adhesive consumption by applying the optimal amount exactly where it is needed. The aggressive tack provides high initial strength and sufficient open time to position materials correctly. The efficient spray pattern delivers excellent coverage with less overspray and waste than competing spray adhesives, helping to create a uniform bond. The combination of fast tack, strong bonding performance, and a clean appearance makes it ideal for edge banding and panel lamination applications.
