Filter SR 510 Particle P3 R

Produktnummer: SUNH02-1312

Mechanical particle filter with exceptionally low breathing resistance for protection against all types of particles.

Unrivalled mechanical filtration. Captures 99.997% of particulate matter, including wet and dry solids, dust, fibres, and liquid aerosols. It is designed for all Sundström equipment, maximising service life and reducing the need for filter changes. Can be combined with gas filters for a fully customisable solution. Reusable and compatible with new gas filters.

Use with the SR 221 prefilter for daily replacement. Strong sustainability profile, offering long service life and cost efficiency. Provides optimal protection against particles regardless of airflow, humidity, or temperature.
