3M Particle Filter P3

Produktnummer: 3M2138

CE-approved for use in environments containing particulate hazards. Filter and respirator compatibility, as well as approvals, depend on applicable regulations. Refer to the technical data sheet to verify that the filter and respirator are approved for your intended application.

The bayonet-style connection is compatible with a wide range of reusable 3M™ full face masks and half masks.

The filters help reduce exposure to a variety of dusts, mists, and other particulate contaminants, as well as certain airborne biological particles, when used for respiratory protection.

Manufacturer Website: 3M™ Particulate Filter, P3 R, 2138
