Coverall Heidrun, Waterproof, FR

Produktnummer: AAL115-4100

This waterproof coverall is made from a durable, heavy-duty material designed to withstand mechanical wear and tear. It is certified according to ISO 14116 (Limited Flame Spread), making it highly suitable for use in offshore and energy industries.

The suit is resistant to oil, cold, and grease, with a smooth surface that is easy to clean. Because of these properties, it is also commonly used as protective workwear during cleaning of production lines and similar operations.

The Heidrun coverall features a front plastic zipper concealed by a storm flap secured with velcro fasteners. The sleeve and leg openings are adjustable with metal press buttons, and the waist can be adjusted internally for a better fit.

Features:

50 mm welded reflective tape on shoulders

- Front closure with one-way plastic zipper and hook-and-loop storm flap
- Hood with drawstring and metal press button
- Adjustable leg openings with metal press buttons
- Adjustable sleeves with metal press buttons
- Internal waist adjustment with clip
- Stitched and welded seams

Certifications:

- EN 343:2019, 3-1-X
- EN ISO 14116:2015 Index 1
