WORKHAND

Glove MecDex Grip AP831

Produktnummer: WORAP831

AP831

Excellent gloves for rappelling, belaying, and via ferrata routes. Good breathability and extra strong grip.

Description Technical climbing glove made from synthetic leather that protects your hands from abrasion caused by ropes and cables.

Breathability and a grip pattern in the palm and fingers, along with an extra reinforcement patch strategically placed at the thumb base for added durability.

Tailored construction ensures comfort and functionality, and the neoprene cuff with a sturdy hookandloop closure keeps the glove securely in place.

A practical touchscreencompatible patch on the index finger works on your phone.

Manufacturer Website: AP-831
