MSA Workman Spreader Bar, Aluminium Snaphook

Produktnummer: MSA10115551

The MSA Workman Spreader Bar is an accessory for the MSA Workman Premier or Workman Utility harnesses and is used when raising and lowering persons during a rescue. This particular version has an aluminium snaphook. To use the spreader bar the attached web loops can be used to secure an incapacitated victim's arms when lifting or lowering.
This accessory for MSA fall arrest equipment is certified to EN 354.
