Insole Sorbothane Shock Stopper DOUBLE Strike

Produktnummer: SOR70244DS

Sorbothane Double Strike Insoles, Shock Absorbing Shoe Soles for Work Boots, Running, or Walking, Impact Reducing Footbeds for Plantar Fasciitis, Heel Support, and Arch Pain

Sorbothane Double Strike features advanced double shock absorption for both the heel and forefoot, delivering superior comfort with every step.

The built-in heel cup helps stabilize and support the foot's natural cushioning, enhancing protection and reducing impact. Integrated midfoot support provides added relief and support for the arch, promoting better comfort throughout the day.

The insole is topped with breathable Coolmax fabric, designed to improve airflow and effectively wick moisture away from the foot for a fresher feel.

Designed to fit most sports shoes, these insoles can be used as a replacement for, or in addition to, your existing insole.

Sorbothane insoles are exceptionally lightweight and feature trim-to-fit guidelines, allowing for easy and precise customization to your shoe.

As a market leader in shock absorption technology, Sorbothane absorbs up to 94.7% of impact vibrations with every foot strike.
