Gloves MICROFLEX™ 93-243(Box à100)

Produktnummer: ANS93-243

Extra-long disposable gloves for superior product and worker protection

Key Features and Benefits:

- Chemical splash protection: Durable nitrile ensures excellent protection
- Elbow-length cuff designed to prevent roll-down: (15.4"/390mm) Extra length provides added security
- Made without accelerators: To protect from allergic reactions

Description:

- Extended chemical protection: MICROFLEX™ 93-243 gloves feature an extra-long cuff to shield more of your arm and provide excellent chemical splash protection — ideal for laboratory and pharmaceutical manufacturing, as well as food processing workers
- Reduced allergy risk: Manufactured without accelerators, helping to protect users from Type IV skin allergies
- Ultra-long cuff design: MICROFLEX™ 93-243 gloves feature an elbow-length cuff designed to prevent roll-down and minimize the risk of cross-contamination
- Secure grip: The textured palm and fingers of these gloves results in a more confident, secure grip of instruments and glassware
- Product protection: To prevent contamination and protect product integrity, these gloves are packed in polybags

- Enhanced tactile sensitivity and dexterity, especially for delicate procedures

Packaging: 100 gloves per polybag, 10 polybags per case, 1000 gloves per case
