NLG Tether Ring™, Large 2,2lbs

Produktnummer: NLG101275

Tether Ring™ Large — creates a tether point on tools with captive holes. Easy-to-use ring for larger tool handles and sections.

Description:

- NLG Tether Rings™ are an economical solution for creating a tether point on a tool with a captive hole. Shaped tools, such as spanners, are also particularly suited to this type of attachment as the Tether Rings™ move freely along the length of the tool and allow the tool to rotate through 360 degrees.
- Quick and simple to apply, the NLG Tether Ring™ only requires a pair of pliers to open and wind onto the tool similar to a key ring.
- The NLG Tether Rings™ are specially coated to prevent corrosion and provide a dependable tether point for the harshest working environments.
