NLG Drill Harness™

Produktnummer: NLG101663

Drill Harness™ — universal harness creates secure tether point on rechargeable drills. Quick attachment, secure during operation.

Description:

The NLG Drill Harness™ is the most advanced and simple-to-use option for tethering rechargeable drills and other rechargeable tools on the market.

The Harness is lightweight, durable and eliminates many of the frustrations with existing options. It allows the rechargeable battery pack to be easily replaced without the tool itself having to be untethered, improving work performance and safety.

The ArmourPlate™ base has been developed to provide an anti-slip base that allows the tool itself to be stable if placed on a surface and protects the battery pack from unnecessary damage.

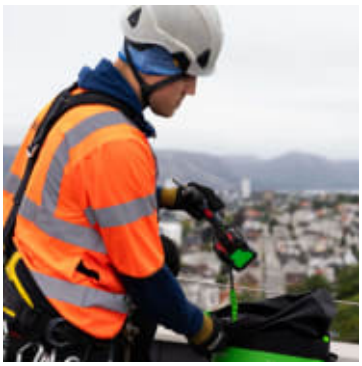

Features:

- Universal solution for the tethering of rechargeable drills, impact drivers and other rechargeable tools
- Battery pack can be easily changed whilst the tool stays tethered
- Added protection and stability with the ArmourPlate™
